

School of Computing & IT

Web Programming (CIT2011)

Lab 3 – HTML, CSS3

Semester 1 Academic Year 2026-2027

Lab Activity 1 — University Student Profile Page

Scenario

The School of Computing & IT wants a simple webpage that introduces a student to visitors during an orientation programme.

Students must create a **Student Profile Page** using only:

- HTML5
- CSS3
- No JavaScript
- No Bootstrap or other frameworks
- No Ai generated code

Learning Objectives

By the end of the activity, students should be able to:

1. Create a basic HTML5 document.
2. Use semantic HTML5 elements.
3. Organize information using headings, paragraphs and lists.
4. Create hyperlinks and images.
5. Create a simple HTML5 form.
6. Apply CSS3 using different types of selectors.
7. Separate HTML content from CSS presentation.

Student Requirements

Your webpage must contain **at least 8 different HTML5 elements, include <div> and **. Create a responsive layout for a mobile screen.

Required Content

Create a student profile containing:

1. Header

- University name
- Page title

2. Navigation

- Home
- About
- Courses
- Contact
