

**The University of Technology, Jamaica**  
**School of Computing and Information Technology**  
**Web Programming [CIT2011]**  
**Semester 1 AY 26-27**  
**Individual Assignment #1**

**Due: Week 5**

**Note Well!**

*Failure to follow the project instructions, broken link, broken path, inconsistent styling, ai generated code, etc will attract **2% penalty for each violation**.*

***Excessive AI generated code is forbidden.** AI usage must be restricted to documentation, and problem solving, and, must not be used for solving the core logic of the website. This assignment must be developed using vanilla HTML5, and CSS3. You are only permitted to use Google Materials, and Google Fonts.*

*No late assignment will be accepted. A '0' grade will be awarded to all assignments that are submitted after the due date and time.*

*Assignments not submitted on the Moodle platform will be given a zero [0] grade. Unless otherwise advised by your tutor.*

**Description**

You are required to build a Portfolio website about yourself. Your website will include details based on the **Instructions** and questions [Q1-Q6] outlined below. Your website will showcase your unique creativity and perspective.

**Instructions**

- Write all code **from scratch** *using plain HTML5 and CSS*.
- Do **not** use JavaScript, frameworks, or WYSIWYG editors [Dreamweaver, Word, etc.].
- Organise files into folders as follows:
  - Codes/ → all HTML files
  - Assets/ → all images/media
  - style.css → external stylesheet linked to all pages
- Save your folder using your student ID [e.g., 1234567\_IA1\_S1AY27].
- Upload the zipped folder + working hosting link to **Moodle** before the time expires.
- **Create a GitHub account using your UTech student account.** Give your account a professional and meaningful name. *Upload all your IA#1 web programming source code and deliverables to your repository.* Share the link to your repo with your tutor, eg [www.https://www.github.com/jbrown\\_12345\\_utech](https://www.github.com/jbrown_12345_utech)

**Q1. HTML Structure & Semantic Tags [5 marks]**

- Create an index.html file [1 mark]
- Correct **doctype, head, and body structure**. Must exist for all .html files. [2 marks]
- An image of the face of your UTech issued school ID. When clicked this image must use a local mail client to create and send an email from you to your tutor. Include a meaningful subject statement \*see class policy on Module Outline. [2 marks]

**Q2. CSS Styling [12 marks]**

- Use variables to set and apply a consistent **colour scheme**, readable **font family**, etc, across all pages. [2 marks]
- Include at least **6 different types of CSS selectors**. [3 marks]

- Must be simple/minimal, unique/reflective of your skill level, creative, consistent, and organised layout, etc [5 marks]
- Design a responsive layout for multiple screen sizes (including a mobile). [2 marks]

### Q3. Navigation & Linking [5 marks]

- Add **navigation** that links to the portfolio content. [2 marks]
- Include at least one **external hyperlink** of your choice. [1 mark]
- Add at least one **bookmark link** [internal anchor] on the “Personal Development” page. [1 mark]

### Q4. Page Content (at least 4 webpages)

#### 1. Professional: [8 marks]

- Use the information from the following link <https://careerservices.fas.harvard.edu/resources/create-a-strong-resume/> to create curriculum vitae or resumé. Additional reading, <https://www.indeed.com/career-advice/resumes-cover-letters/what-makes-a-good-resume>
  - If you do not have any job experience, then *create a resume for your future self*; imagine the places you would like to work and the work you get to do. Including the projects and experience you will get along the way at these imaginary workplaces. Dream BIG. [4 marks]
  - Provide a list of and a link to all your previous working assignments/projects completed for the CIT2011 S1 AY2026 lab/tutorial sessions so far. [4 marks]

#### 2. Personality: [12 marks]

- Showcase how your top three [3] strongest personality traits, hobbies, etc., describe importance of, and the impact these traits, emotions, and hobbies have on your school/academic life. [3 marks]
- Describe a **favourite scene, personal motto or quote** from your hero, mentor or the person you look up to the most. [4 marks]
  - Your hero can be anyone, a celebrity, sports icon, family member, friend, real or fictitious, etc.
  - Provide background details about the hero and explain what it is about them that makes them your hero.
- Given the statement “**LLMs such as ChatGPT, Claude, and CoPilot must be used as a tool not a crutch**”. Write a short critical essay/blog on what this statement means to you as a student. When where and how can LLMs be used in your studentship to enhance and improve your learning”. Provide reference to sources. [5 marks]

#### 3. Personal Development: [8 marks]

- Using the following link <https://icrrd.com/public/media/16-05-2021-070111The-Richest-Man-in-Babylon.pdf> to download and **read 2 Chapters**
  - “7 Cures for a Lean Purse” and
  - “5 Laws of Gold”

from “The Richest Man in Babylon” by George S Clason; of course, you may read and reread the entire book. Reflect on what you have read and elucidate on each chapter; write meaningfully, explaining how you could align what you read to your life, and what is your biggest take away from the book. *(no ai generated report, this will result in a zero grade for the entire assignment)* [8 marks]

4. **Other: [10 marks]** A pdf document that usually contains:
- Storyboard - Draw two [2] separate layout designs, one for mobile [min 600px] and one for desktop [min 950px]. This can be hand-drawn or done using an app or tool, eg Figma, SketchUp, etc. Webpages must match layout. **[4 marks]**
  - Include a complete list of the assets to be used such as the intended colour palette [including the RGB], icons and its dimensions, font-family, root font-weight, etc. **[2 mark]**
  - A link to your **GitHub repository** with the IA#1 source code, resources, such as images, and files such as “storybard-id#.pdf”. **[1 mark]**
  - Free hosting link **[1 mark]**
  - An APA formatted reference** page that includes all the bibliographic sources of information used in creating the IA#1 website, i.e. books, websites, etc. **[2 marks]**

**Q5. Technical Accuracy [5 marks]**

- Provide screenshots - Ensure **no major validation errors** in HTML or CSS [well-formed code]. Use the following validator [https://validator.w3.org/#validate\\_by\\_upload](https://validator.w3.org/#validate_by_upload) **[4 marks]**

| Section                                                               | Marks     |
|-----------------------------------------------------------------------|-----------|
| Q1. Structure & Semantic Tags                                         | 5         |
| Q2. CSS Styling – must be simple/minimal, useful, Unique, varied, etc | 12        |
| Q3. Seamless, logical Navigation                                      | 5         |
| Q4. Page Content                                                      | 38        |
| Q5. Technical Accuracy                                                | 5         |
|                                                                       |           |
| <b>Total</b>                                                          | <b>60</b> |

*Failure to follow the project instructions, such as broken link, paths, etc will attract **2% penalty**. Excessive Ai generated code is forbidden. The aim for you to use vanilla HTML5, and CSS3 to complete this assignment.*

**Note Well!**

*No late assignment will be accepted. A ‘0’ grade will be awarded to all assignments that are submitted after the due date and time.*

*Assignments not submitted on the Moodle platform will be given a zero [0] grade. Unless otherwise advised by your tutor.*

THE END
